# TCx™ 300 Series

A smarter checkout in less space, lower cost

# A great fit

- › Up to forty percent higher performance with Intel low power technology<sup>1</sup>
- › New features include more solid state drive (SSD) options with potential to increase reliability
- › Energy-wise design

The new Toshiba TCx™300 Series brings smarter store solutions to small and midsized retailers who need a high-performing, energy-efficient point-of-sale system with a small footprint—and at the lowest cost. Now offered with the powerful and rock-solid Toshiba 4690 Operating System<sup>2</sup>, the TCx™300 delivers top levels of customer service for any size retailer, including support for the Toshiba TCxGravity Link for 4690 solution that drives new and innovative revenue opportunities.

## More frills where it counts

When Toshiba introduces a new point-of-sale system, the POS has functionality that our clients need most. Today that means enabling a retailer to offer personalized, interactive services from multiple channels and devices at checkout. In less than a foot of counter space, the small TCx™300 packs big features that energize the shopping experience for customers and employees, and that help grow sales faster for the retailer.

Next-generation technologies include the same chip set as on the flagship SurePOS 700 Series; and an optional solid state drive—all to deliver performance enhancements and optimize the most demanding customer service solutions. With the latest system, employees and shoppers are empowered to interact in new ways and with a wide choice of devices, including mobile.

Superior graphics ensure multimedia applications respond at their best, such as videos and third-party promotions on customer-facing displays. Memory scalable up to 16 GB<sup>3</sup> and replaceable SurePorts mean retailers can use existing assets and introduce new services and devices as needed. Embedded security features help protect against viruses and tampering.

#### **Lower cost where it matters**

The Toshiba TCx™300 helps retailers save money where it matters—over the long run. With earth-friendly technology that saves energy and increases reliability, the TCx™300 can help reduce power bills while providing a long service life. Deep sleep, for example, allows the POS system to be in a low power state when checkout lanes are idle, then put back to use in seconds, saving up to 47 percent energy.<sup>4</sup>

Remote Management Agent, which can be enabled to automate deep sleep, also allows system monitoring from a single console in the store or remotely. So technicians have quick access to the POS and devices for software and security updates, and to keep tabs on system health. Easy, virtually tool-free serviceability and remote monitoring help keep POS maintenance costs low and checkout lanes moving.

#### **Sized right for any checkout environment**

The TCx™300 packs big features into a small space. The footprint measures only about 10 inches, which frees up space on a checkout counter for retailers to display and sell impulse items that can increase revenue. Smartly designed front vents promote front-to-back airflow so that the powerful system stays cool without side vents, allowing it to be placed in a variety of places, even tight spaces.

As for all Toshiba retail solutions, systems and peripherals are tested, engineered and color coordinated to be compatible. Every detail—even to the latching connection—is designed and optimized to work together as a total store solution. So there is no guesswork when adding services and devices.

# FEATURES

- 1 Compact footprint and distributed design
- 2 Intel® Celeron® G1820TE or Core i3™ 4330TE processors provides up to 40 percent performance improvement
- 3 80 PLUS Gold power supply
- 4 Up to two video ports can be used, choose from two display ports, one VGA, or an optional 2nd VGA. Two ports can be used to support dual independent video.
- 5 Storage options include 500 GB hard drive and 64 GB or 128 GB. Solid state drive (SSD) options that can help speed performance, availability and reliability
- 6 Deep sleep automation and built-in power management let POS “nap” and lower energy costs
- 7 Remote Management Agent
- 8 Virtually tool-free access to key components
- 9 Sensor driver allows proactive monitoring of the health of the system
- 10 Selectable and upgradeable SurePorts enable retailers to use existing devices and connect customer or employee devices
- 11 Front vents promote front-to-back airflow keeping the system cool and help keep systems up and running
- 12 Retail-hardened design
- 13 Engineered for retailers with components designed to work together seamlessly
- 14 Open platform and broad operating system support, including Toshiba 4690 V6.5 Enhanced
- 15 Service and parts available up to seven years after withdrawal
- 16 USB and PS/2 67-key, 67-key with LCD, ANPOS, and compact ANPOS (all optional)

\* Memory supports both system and video. Accessible system memory will be the installed memory size less the amount defined for video.

† Not all peripherals are available in all countries. Please contact your local Toshiba representative for details.

‡ Microsoft Embedded preload standard on E60, E6A, E70, E7A. On other models an operating system is not included but can be purchased separately.

§ Power management functionality is device-dependent.

\*\* Terms may vary by country. For a copy of the terms and conditions of Toshiba's Statement of Limited Warranty, please contact your Toshiba representative or reseller.

†† Technical support response times may vary.

# CONTACT US FOR SALES ASSISTANCE

## For More Information, Contact Us Today

Contact us or your local Toshiba representative to learn how the TCx™300 can create a better shopping experience for your customers and a smarter operation for your business.

Or visit:

[www.toshibacommerce.com](http://www.toshibacommerce.com)

Additionally, Toshiba Global Commerce Solutions can help credit qualified clients acquire the solutions that your business needs in the most cost-effective and strategic way possible through our global financing partner.

## Together Commerce

Together Commerce is Toshiba's vision for the new future of retail where retailers adapt their strategies, their stores and their technology to engage with consumers throughout the buying process in a seamless and helpful way. This collaborative approach enables retailers and customers to create mutually rewarding commerce—together.

## Trust Toshiba's retail experience

As the world's leading provider of integrated in-store solutions and retail insights, Toshiba Global Commerce Solutions delivers end-to-end solutions for checkout, consumer interactions and retail operations that unlock amazing new possibilities for our clients and shoppers everywhere.

## TCx™300 Series

- 1 Performance comparison to previous model 350.
- 2 Available with NVRAM feature on models 360, 36A, 370, 37A
- 3 MB/GB equals one million/billion bytes when referring to storage capacity; accessibility may be less.
- 4 Turning on deep sleep for 12 hours should save an additional 47%.
